PROFESSIONAL SUMMARY

Cyber Security Professional with 4+ years of experience spanning Governance, Risk, and Compliance (GRC), security consulting, and training delivery. Specializes in ISO/IEC 27001 ISMS implementation, risk assessments, internal audits, VAPT, and SOC operations. Designs and delivers training programs covering CompTIA certifications, ethical hacking, GRC frameworks, and CISA domains for international students and working professionals. Skilled in IT governance frameworks including ISO 27001, NIST, COBIT, with hands-on experience in ITGC reviews, vendor risk assessments, phishing simulation programs, and control gap analysis. Holds ISO 27001 Lead Auditor, CompTIA Security+, CySA+, A+, and CISA (exam June 2026) certifications.

EXPERIENCE

Cyber Security Consultant & Trainer | [NIIT](#) | Gurugram, India (Remote) | June 2025 – Present

Consulting Role

- Supported ISO/IEC 27001:2022 ISMS implementation activities including control reviews, risk assessments, and audit preparation.
- Maintained ISMS documentation including policies, SOPs, risk registers, asset inventories, and compliance repositories.
- Coordinated internal and external audit activities by collecting compliance evidence and tracking remediation activities.
- Performed periodic user access reviews, privileged account validations, and vendor risk assessment activities.
- Supported compliance reporting, security awareness initiatives, and nonconformity tracking for continuous ISMS improvement.

Training Role

- Designed and delivered training programs on CompTIA A+, Security+, CySA+, ISO 27001 Lead Auditor, and CISA professional courses, mentoring international students toward certification success.
- Conducted hands-on workshops, mock audits, and practical labs on ethical hacking, SOC operations, VAPT methodologies, and ISO 27001 ISMS implementation, achieving 90%+ pass rates.
- Provided personalized mentoring on GRC frameworks, risk assessments, ITGC, and compliance standards, guiding diverse learners in real-world cybersecurity applications.
- Facilitated interactive sessions with cross-cultural student groups, tracking progress, offering remediation support, and fostering continuous skill development for career readiness.

Cyber Security Specialist & Course Creator | [IntrnForte](#) | Bengaluru, India (Remote) | June 2025 – Sep 2025

- Designed and published a structured Cybersecurity Course and Certifications program on the IntrnForte platform, covering foundational to intermediate security concepts.
- Mentored 100+ learners through hands-on lab environments built using DVWA, Juice Shop, Kali Linux, Metasploit, and Burp Suite.
- Guided learners on GitHub portfolio building and career transition strategies for entry-level cybersecurity roles.
- Designed capstone projects focused on VAPT methodology and Linux hardening, giving learners submission-ready portfolio pieces.

Cyber Security Trainer | **Imarticus Learning** | Bengaluru, India | Weekends | March 2025 – Dec 2025

- Delivered a comprehensive PG Diploma in Cybersecurity covering Ethical Hacking, SOC Operations, Cloud Security, Risk Management, and Governance frameworks to international students.
- Integrated ISO/IEC 27001 principles, risk assessment methodologies, and compliance best practices into curriculum, preparing learners for Security+, CySA+, ISO 27001 LA, and CISA certifications.
- Guided learners through hands-on security case studies, incident response simulations, mock audits, VAPT labs, and compliance gap analysis, achieving 85%+ certification success rates.

Associate Cyber Security Consultant | **GA Software Technologies Pvt. Ltd.** | Bengaluru, India | Jan 2025 – Jun 2025

- Conducted VAPT across web applications and internal networks, mapping vulnerabilities to ISO 27001 controls and business risks.
- Supported ISMS implementation projects through control gap analysis, remediation planning, and compliance activities.
- Assisted in audit evidence collection and collaborated with stakeholders to improve IT control effectiveness.
- Managed phishing simulation campaigns and performed third-party vendor security assessments.

Associate Cyber Security Consultant | **Texial** | Bengaluru, India | June 2023 – Dec 2024

- Conducted VAPT assessments across web applications and internal environments aligned with ISO 27001 requirements.
- Supported ISMS projects through audit evidence collection, control reviews, and remediation tracking activities.
- Mapped technical vulnerabilities to business risk and ISO 27001 control objectives, supporting risk-based decision-making.
- Managed phishing simulation campaigns and contributed to organisation-wide security awareness initiatives.
- Performed vendor security reviews and assessed compliance against organisational policies and standards.

Cyber Security Trainer | **Grad Gurukul** | Bengaluru, India | March 2024 – Dec 2024

- Delivered cybersecurity training covering Ethical Hacking, Network Security, SOC fundamentals, VAPT methodologies, and Linux security to students and working professionals.
- Designed hands-on lab environments using Kali Linux, Metasploit, Burp Suite, DVWA, and Wireshark, giving learners practical exposure to real-world attack and defense scenarios.
- Guided learners through structured learning paths aligned with CompTIA Security+, CySA+, and ISO 27001 LA certification objectives.
- Conducted mock assessments, doubt-clearing sessions, and career mentoring, supporting learners in transitioning into cybersecurity roles.

EDUCATION

Bachelor of Engineering (B.E.) in Information Science | CGPA: 7.9

Raja Rajeswari College of Engineering, Bangalore

CERTIFICATIONS

- CISA – Certified Information Systems Auditor (Exam June 2026) | ISACA
- ISO/IEC 27001:2022 Lead Auditor | Issued: Feb 2026
- CompTIA Security+ | Issued: Sep 2025 (Expires Sep 2028)
- CompTIA A+ | Issued: Sep 2025 (Expires Sep 2028)
- CompTIA CySA+ | Issued: Nov 2025 (Expires Nov 2028)

TECHNICAL SKILLS

GRC & Frameworks: ISO/IEC 27001, NIST CSF, COBIT, CIS Controls, PCI-DSS, SOX, SOC 1 & SOC 2, ITIL, GDPR, DPDP Act

Governance & Compliance: ISMS Implementation, Risk Assessments, ITGC, Internal Audits, Gap Analysis, Control Testing, Compliance Evidence Management, Remediation Tracking

Third-Party Risk: Vendor Risk Assessments, Security Questionnaires, TPRM, RFP Security Reviews, Compliance Validation

Security Tools: Splunk, IBM QRadar, Burp Suite, Nessus, Metasploit, Wireshark, Nmap, Phishing Simulation Management

GRC Tools: ServiceNow GRC, RSA Archer, OneTrust, ISO 27001 Documentation & Risk Register Management

Cloud Security: AWS (IAM, VPC, Security Groups), Azure Security Center, Docker, Terraform

Programming & Scripting: Python, PowerShell, Bash, SQL, JavaScript, C++

AI & Automation: OpenAI GPT-3, Meta Llama, Ollama, AI-driven Security Automation

Other Tools: SBOM Tools (Trivy, Syft), Brity RPA Designer, VS Code, Git, LaTeX Documentation

Soft Skills: Communication, Stakeholder Management, Cross-functional Collaboration, Analytical Thinking, Problem Solving

PROJECTS

GPT-Vuln-Analyzer | Python, AI (Llama2, GPT-3, PaLM, Ollama)

- Built an AI-powered vulnerability analysis tool integrating Llama2, GPT-3, and Google PaLM for intelligent threat detection and risk prioritisation.
- Designed modular, scalable architecture with DNS reconnaissance capabilities, demonstrating applied AI governance and security automation.

Startup-SBOM | Python, Linux, Reverse Engineering

- Reverse-engineered the Linux boot process to extract startup sequence data and analyse RPM/DPKG package capabilities for supply chain risk visibility.
- Developed a detection tool using chroot validation to identify and list potential startup entries with high accuracy.

QuadraInspect | Python, Reverse Engineering, Android Security Testing

- Built an Android security analysis framework integrating multiple tools for comprehensive vulnerability detection and reverse engineering assessments.
- Enhanced structured reporting to deliver detailed, actionable vulnerability insights aligned with security review standards.

Brute-Hacking-Framework | Python, Batch Scripting, Reverse Engineering

- Recreated a portable penetration testing environment through reverse engineering of core architecture, designed for Windows compatibility and maximum portability.
- Streamlined penetration testing workflows by improving tool accessibility, configuration management, and upgradability.

PUBLICATIONS

AI Against Adversaries: Deep Learning's Role in Malware Detection Using Autoencoders

International Journal of All Research Education and Scientific Methods (IJARESM), May 20, 2024

HONORS & LEADERSHIP

- Mentored 200+ students and freshers in cybersecurity fundamentals, career pathways, and hands-on security practices.
- Recognized as CompTIA Security Analytics Professional (CSAP), a stackable certification issued by CompTIA.
